LEON COUNTY FOOD CO-OP - GENERAL MEMBERSHIP MEETING

A revised set of By-Laws for LCFC was approved at the general membership meeting held on April 9, 1975 in 120 Carroway, FSU. The By-Laws govern only the procedures for the store co-op. A new corporate structure For Community Interests, Inc. (our parent corporation) and By-Laws for it were also approved. Each branch of the corporation will be autonomous with its own Board of Directors (currently LCFC and the Hogtown Grainery in Gainesville). Each branch will send a representative to the corporate Board of Directors which oversees interaction of the branches, organizing new branches, and special projects (e.g. the People's Southeastern Warehouse).

In other business five seats on the Board of Directors for LCFC were up for election. Jeff Thompson and Dale Wadatz were re-elected to the board and Jackie Moore, Barry Sagler and Rob Dunn also were elected to positions. The following persons were nominated as officers for the corporation: President - Bob Wilson, Vice-President - Lois Biggel, Secretary/treasurer - Amy

Jacobs. The Board of Directors of C.I., Inc. will elect officers from this state and nominees from the Hogtown Grainery.

The membership also voted to support the international boycott of products from nations which have not stopped the hunting of whales. Specifically, the co-op will no longer order products produced by Japan or Russia.

BOARD OF DIRECTORS FOR LCFC

The following are your elected representatives to the governing board of the co-op. Let them know your problems, criticisms, suggestions, and questions concerning any aspect of the co-op.

Rob Dunn - 877-9548	Barry Sager - 224-5437
Lynn Griffin - 644-3000	Jeff Thompson - 575-1146
Jim Laney - 575-4391	Dale Wadatz - 575-1146
Jackie Moore - 1-926-3458	Ann Zabaldo - 386-2396
Melynda Reid - 222-3867	

...from the lap of
the editor...

ITEMS OF INTEREST

4/8/75

The LCFC Board of Directors at a recent special meeting unjustly subjected Candi Papparone to extensive humiliation and degradation based on what they believed to be the truth as related to them by one of the Senior managers of the Cooperative. Unfortunately, the differences of opinion and personality clashes stem from personal prejudice and lack of structure within the Cooperative system. Formal job descriptions (a necessity with three managers) and structural manipulation of the integral aspects of the store are necessary to coordinate the academic activities of its members with their work expectations. Stringent control of the managers by the Board of Directors (your chosen representatives) is definitely needed to prevent "delusions of grandeur" on the part of any one individual within the cooperative.

The peoples' investment must be protected against such internal anarchy. As it exists right now there are approximately 600 members of your cooperative and a "ruling" structure of less than 50. This type of inactivity by the owners of the cooperative (you the people) can only cause this sort of injustice and internal strife. To protect your investment and your representatives in the future get involved and attend the next general membership meeting at the beginning of next quarter.

...here is the final decree...

April 9, 1975

Dear Candis,

The events, and hassles, of the last two days have had a strain on all of us associated with the operation of the co-op. Tempers have flared, emotions were high, feelings have unfortunately been hurt. Over the past several months, the Board of Directors has finally realized that it has failed in some areas of leadership, especially in its relation to and control of the managers of the co-op. These shortcomings have had a part in affecting your role and performance as a manager, and we regret that greatly.

After our discussions at the store Tuesday night with you, and again after the membership meeting this evening, the Board has agonized over the problems which have arisen. With great reluctance the Board has voted to accept your resignation as manager if tendered, or to ask for your dismissal. You will be given two-weeks severance pay. The decision was based on the belief that the problems and differences of opinion were irreconcilable.

We realize that you have much to offer the co-op and hope that you will continue to put your efforts towards its success. We especially hope that you will continue the newsletter as your efforts have been much appreciated.

With much regret,

Jeffrey Thompson
Chairperson, Board of Directors
Leon County Food Co-op

COOLER - 8x12x16 feet to keep fruits, veggies, nuts, flours. Temp. will be 36-40 - Capacity will be large enough to supply LCFC and a fruit & veggie coop or two on the side. Workers on the project have included Jeff Clements, Ray Rattien, Cyril Kensler and Jim Gearing. By the time you read this it should be running.

FOOD TALKS....."There is no federal agency or law that defines and supervises the label organic and certifies

that such foods do in fact, fit that description; thus there exists an avenue for obvious consumer fraud."

Pg. 1073, Vol. 27, October 1974 - Am. Journal of Clinical Nutrition

NORTHSIDE STORE

The idea of food cooperatives is certainly not a new one. However, many people are unaware of the benefits they can derive by simply spending a little of their time and energy to make one work.

Basically, a food co-op is an economic unit that operates on a very slight overhead and can therefore sell its products to its members at practically the same price it pays. In other words, a co-op depends on its membership to provide voluntary labor; either in the form of actual work in the store or assistance in various other aspects of the business where individuals may be skilled. This work is compensated for, not with an exchange of money but through an added discount towards his groceries.

The membership is also the governing body of such an organization. The store policies directly reflect the needs of the people who use it. If, for example, the co-op members can channel their tastes along the natural growing seasons, they can buy fresh fruit and vegetables and inevitably get the highest quality produce at the lowest prices. Or, if the members needed a protein substitute for today's overpriced meats, large grain wholesalers can supply the beans and grains at tremendous savings. But, above all, the store will evolve as do the needs of the members.

At present, a small dedicated group of people, both students and community members are working at readying a store at 219 E. Third Avenue (between Monroe St. and Thomasville Rd.) The landlord was gracious enough to delay the payment of the first month's rent until May first, so between now and then, we must gather at least 200 paid members before we can begin business. Our landlord, by the way, was our first paid member! We require a membership fee of \$5.00 and a non-interest loan of at least \$10.00 to finance our initial investment. A check or money order can be sent payable to Blue World Co-op, 1014 N. Monroe St., Box #5, Tallahassee, Florida, 32303.

Your benefits are great; your investments, slight.

SIGN UP NOW!!!!

For more information, call David Rosenfeld at 224-4325.

ERA

4/14/75

The Parade from the Governor's Mansion to the Capital steps, to say the least, was quite a success.— the women, men & children walking, singing, chanting " E R A NOW " ... " Vote for Us will Vote for You " were fantastic ! The words the speakers spoke were words of truth — but whether or not the 19th Ammendment is revised, if it has to go on another 1 or 50 years, the women of this Country black, white and babes, are not going to give up or forget the importance of **Equal Rights for All !**

APALACHEE RECYCLING

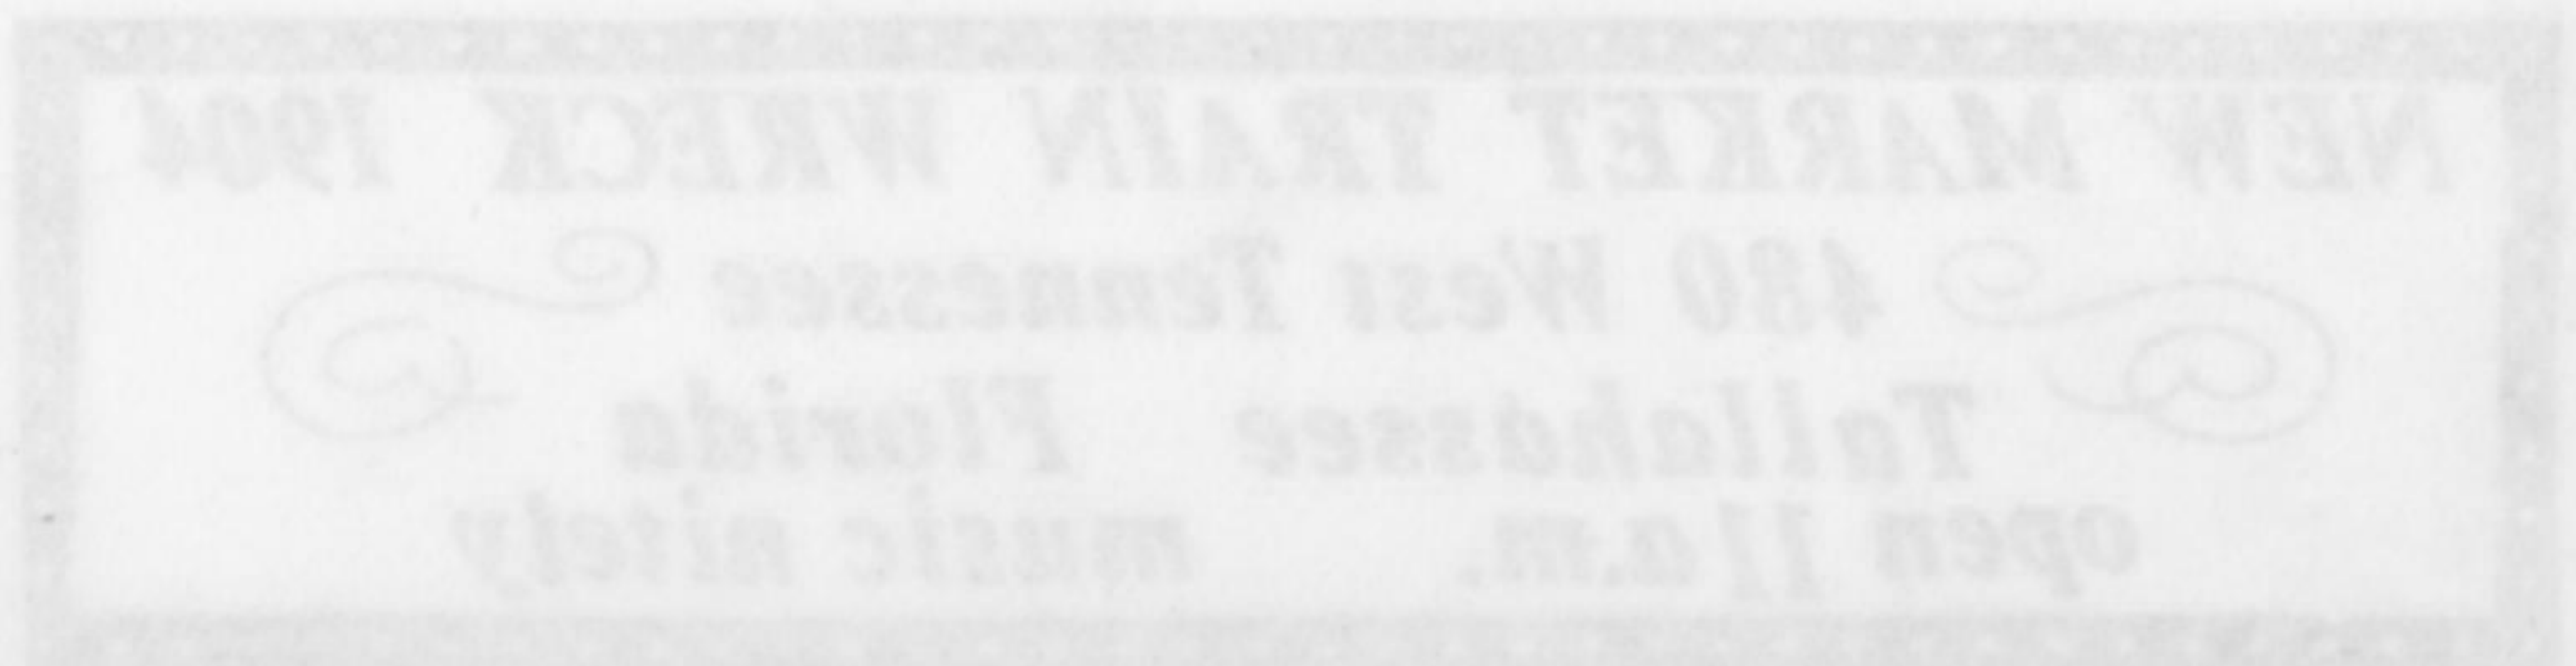

How you can help- if you live in an apartment complex dorm or trailer park- put a cardboard box in the laundry labeled "for aluminum only" and keep an eye on it so it doesn't overflow. When full bring it to the co-op or call for free pick-up.

HOW TO RECYCLE WASTE THROUGH THE CO*OP***** (APALACHEE RECYCLING CENTER)

- 1- ALUMINUM*- cans in tall outside bin (aluminumm cans are seamless)
- 2- CARDBOARD in large bin and cardboard ONLY - we have to take newspaper and mags to the dump so stop unloading on us!
- 3- GLASS - for CO-OP USE- clean, label free with lids.
for RECYCLING- clean, labels on or off - no metal rings or lids left on!

THE FUTURE!!!!!!

FROM: Jim Laney
Public Relations Dept.
LCFC Tallahassee, Florida
April 11, 1975

WAREHOUSE IS NEXT:

In a drive to further reduce prices to people in the Tallahassee community, a People's Southeast Warehouse is becoming reality.

Co-ordinator Joe Christy, in Minneapolis for a 4 week workshop on warehouse operations, spoke with LCFC management about initial goals. First is raising \$10,000 for capital to buy food in bulk. Second is to serve co-ops between Miami, Atlanta, and New Orleans by shipping out product by commercial freight. Third is to provide part-time employment for up to 20 people as volume increases. Joe predicted a reduction in prices at our own co-op from fifteen to thirty percent after the warehouse becomes operational.

The 4 week workshop he recently attended at People's Warehouse in Minneapolis was conducted by people like ourselves who are fed up with exorbitant profits on the part of the middlemen. The warehouse has been in operation 4 years. When the average family must spend one-fourth of it's income to be adequately fed, then a quiet revolution may be the only alternative.

News for the Kitchen

By DR. W. C. HARDY, N.D.

A woman can be cured of almost any complaint---tell her it is a sign of old age.

A consoling reflection on poverty is that it is far better to have no breakfast for your appetite than no appetite for your breakfast; and no shoes for your feet than no feet for your shoes.

A modest girl won't pursue a man -- neither will a mousetrap pursue a mouse.

75% of USDA adults are overweight, have high blood pressure or both -- leaving only 25% who could be considered normal in weight and blood pressure.

SNOUT DEBATE: USDA is still trying to settle fatdog controversy -- consumers are split on whether to permit hotdogs & other cooked sausages to contain meat byproducts such as heart, liver, tongue, spleen and even snouts. Currently hotdogs containing any type flesh, including up to 15% chicken are labeled "ALL MEAT". Hotdogs with only one kind of meat can be labeled "ALL PORK" or "ALL BEEF". The Courts have ordered the USDA to drop the "ALL such and such" labels, since hotdogs may also contain up to 30% fat, 10% added water, and 3.5% extenders such as non-fat dry milk and cereal and nitrates. This dispute continues.

3 OUT OF 10 ALCOHOLICS CAN BE CURED BY VITAMINS, says Dr. Russell F. Smith, Director, Michigan Office of Health Services, Detroit. He uses 4,000 Mgm Vitamin B3 daily and gets 30% results. Dr. Hardy's diet gets 75% results in 48 hours with no hang-over and this is equally effective with drug addicts.

RESEARCH has just been published by Dr. John Ylamouylannis, Science Director for the National Health Federation, a non-profit, education Consumers group (Box 688, Monrovia, Calif. 91016+ Reprint 25C with stamped envelope) showing the relationship between FLUORIDATION AND CANCER. In the following cities of 1,000,000 or more population, CANCER DEATH RATES INCREASED ABOVE

THE NATIONAL AVERAGE as indicated without exception after Fluoridation: Baltimore up 34%, Cleveland up 22%, Philadelphia up 27% 27%, Chicago up 18%, New York up 24%, Detroit up 20%. Houston, Texas and Los Angeles, Calif., both still unfluorinated rank better; up 8% for Houston and NO INCREASE for Los Angeles, the only major city in the USA with this hold-the-Cancer-Increase rate. (Organic Consumer Report).

MAN'S Mind stretched to a new idea never goes back to its original dimension

In Education it is indeed regrettable that no one has invented a can opener to open the closed mind.

Always pour boiling water over tea bags when making tea -- Never pour the water first and then add the tea bags. Let Stand 5 minutes for fairly strong tea.

BRAIN NOG FOR BREAKFAST:

One egg beaten in 4 ounces Apricot juice (chilled), add teaspoon lemon juice, pinch sea salt or sea kelp, 1½ cups milk. Shake well and drink. One teaspoon yeast makes it better.

FEEL YOUNG TONIC:

Eight ounces celery juice, 1 tablespoon brewers yeast, one tablespoon raw honey, one tablespoon lecithin granules or powder. Mix well and drink.

DR. HARDYS' PEP DRINK:

One egg yolk beaten in six ounces unsweetened pineapple juice, add six ounces water, tablespoon Brewers yeast, tablespoon raw honey, tablespoon Hoffman protein powder, tablespoon skim milk powder, pinch red pepper, three drops pure vanilla extract. Mix well and drink slowly before each meal. Half hour before breakfast drink large glass HOT water with teaspoon apple vinegar and teaspoon honey in it.

WANT TO QUIT SMOKING? Eat large apple after each meal and at bedtime. Take one Zinc tablet and one Manganese tablet after each meal.

MORE NEXT TIME!!!!!!

Compliments Dr. W. C. Hardy, N.D., 1603 Old St. Augustine Rd., Tallahassee, Florida

GARLIC....is Nature's antibiotic - it kills off bacteria that is foreign to the body, leaving useful bacteria to strengthen resistance.

ANTIBODIES....kill all bacteria leaving a lower resistance, making the system open for disease.

I would suggest when you first start to feel a little off key take one garlic clove every 4 hours for one day (peel clove, smash it open & swallow whole) along with an enema and a fruit diet to cleanse that body!! If you still feel badly on the next day, continue until all is well. (This remedy is for a cold or virus, mainly, altho garlic can be used on any infection, used internally or externally!!

renaissance

Creative Dance Center on Timberland Road is now open and offers classes for children and adults. The center is under the direction of Dr. JoAnne Tucker. There will be a special summer program available for children between the ages of five and twelve in exploring the arts. Classes will meet for three weeks from 9:00 to 12:00 Monday through Friday.

In addition to classes taught by JoAnne, Carol Lessinger, Judy Bloomberg, Sondi Feldmeirer and Carolyn Davis will be offering classes. For more information call 385-0435.

* Voice of the dancer as a teacher...

Tuesday nights, 8:00 to 9:30, Judith Bloomberg teaches a beginning-intermediate modern dance class. Judith holds a bachelor's degree from UCLA and a master's degree from FSU, both in dance. She has studied extensively in Los Angeles and New York and has performed with Gloria Newman, Al Huang, James Cunningham, Phyllis Lamhut and Mimi Garrard Dance Companies—as well as with numerous departmental and master's thesis concerts at UCLA and FSU. Since settling in Tallahassee, she has contributed to a variety of local dance activities including teaching a CPE course "Dance for People", participating in and/or directing three dance presentations sponsored by the Tallahassee Arts Council in the Leon County school system, performed in the local Jewish Dance Company Avodah, and led improvisational dance presentations at the LeMoyne Art Gallery at a fund-raising benefit for the Gallery.

The class she teaches reflects her main concerns for beginning dancers, including a growing awareness of the body and the space the body is moving in, a good supportive alignment and the use of the breath as the basis for easy relaxed flow of movement with natural control. The level of the class is geared to the students attending regularly.

People's Voice

"Isn't it strange how the government has spent billions on putting a man on the moon & earth still has no definite form of birth control!"

In the days of the bible and Jesus, homosexuality was against the natural cycle - for sexual activities were performed for increasing the population (needed at that time) & not generally for pleasure. Today homosexuality is still misunderstood, but is now a part of earth's natural cycle, since humans have over produced & its only in the ignorance of humans to suppress nature!!

Humans are destructive creatures - they'd rather destroy, complain, extend ego's & power - all these things are a waste! A waste of time, energy & creativity! Instead of getting involved & bettering their environment - they stand in closets & voice their opinion. A community needs a better way, a better radio station, a street of shops, a better news -- Let's get together, leaving power trips behind with some strong positive energy & do it! Come on people, change is good & necessary by nature's law; it's the earth peoples' trips that stop real progress - GET INVOLVED TODAY - this broadcast has been brought to you by earth, inc.

EXTEND YOURSELF -- HELP A HUMAN TODAY!!!

THINK BEFORE YOU SPEAK - ALL ANSWERS ARE THERE - THEY'RE NOT ALL IN BOOKS, YOU KNOW - THE MIND IMAGES WERE DEVELOPED FIRST -

Depression is not the end, it's just a tightening up of things (whether it be personal or universal). Things still go & grow on, at just a slower pace & resources may not be as available which makes us more resourceful & clever & we use more of our mind & body resources which suffer during affluent times. "In darkness the seed still grows - it can't sun everyday!" "Its the ancient yin-yang trick" says Magic Jack. A depression is like a retrogradation in astrology - it appears to

be at a stand still or even going backwards instead of forwards - but its necessary for we may have run so fast past something we wouldn't want to miss. Its all for a reason & within the law of nature, so don't worry - be light with yourself - feel yourself, learn to enjoy the simple pleasures of living.

YOUR BODY IS YOUR VEHICLE - KEEP IT TUNED & IT'LL GET YOU WHERE YOU NEED TO GO - NO GUARANTEES OR WARRANTEES - ITS IN YOUR HANDS - FEET - MIND - BODY!

DOCTORS.....Hummmmmmmmm.....Don't be afraid to ask questions - remember its your body - remember he's not your creator - Don't put anything in the body you don't understand. If necessary, do some of your own reasearch.

Most doctors work by trial & error. Somewhere along the line some loose their human reasoning that all systems do not totally function the same, there are some similarities but we're not a precisioned, manufactured product for which you can just order another part - we live & breathe & feel pain & are sensitive & have memory banks - and for G-d sakes don't allow them to cut on the body, take the time to reasearch - do your own trial & error experiments - more "oops" accidents happen under anestisia & sometimes things are removed for no reason, some are just cutters. Now of course its still your choice, these are just views - there are many ways available to us here in the 20th century, just don't forget there are other ways & more than one answer!!

"WHAT IS GOOD FOR ONE IS NOT ALWAYS GOOD FOR THE MASSES"

WASTE NOT WANT NOT --- DEMAND QUALITY NOT QUANTITY!

"Cancer" is one of those fearfilled words like "Communism" - which I will get into more, from the research I've done, in the next issue.

If you have any thoughts to submit to "the People's Voice" send in or drop it by the home of the paper - 319 West College Ave #1, attention Candi. Just place it in the mailbox if no one's there - if you wish to remain anonymous make it your pleasure, we are concerned mainly with truths - the facts that people don't often get - but if you want to sign a name do so!

DON'T DENY YOURSELF, HERE IN THE 20TH CENTURY - JUST DON'T OVER EXTEND YOURSELF -- FOR THERE ARE OTHERS

IT'S ALL ON BECOMING A MAN-WOMAN OF KNOWLEDGE!!!

hummmm...WHO WROTE THE DICTIONARY? YOU CAN ALWAYS FIND THE PUBLISHER, EDITOR, COPYRIGHT - BUT WHO IS THE WRITER? VERY INTERESTING!

A GAY REBUTTAL:

(Cont. "People's Voice")

I am so very tired of reading letters from self-righteous people who have no intelligent understanding of the Bible, that I was prompted to write a rebuttal to Kim Vandagriff's letter (Saturday, March 22) concerning homosexuality.

In ancient times, when the survival of a people depended on procreation, homosexuality was considered an evil because such a relationship would not produce much-needed children. Therefore, the men who wrote the Bible made homosexual practices "abominations" to protect their race of people from extinction. Most of us no longer live in ancient times. Excessive procreation is neither vital nor desirable and, likewise, different standards of sexuality are no longer crimes against man or his survival...

I am constantly amazed by people who claim to be Christians and then fail to show the love and forgiveness that their faith is supposedly based on. They choose to follow those parts of the Bible which suit their own purposes. The Bible is primarily an anthology of the history and literature of the Hebrew and early Christian People. It is filled with both relevancies and antiquities. The truly intelligent person understands which is which and does not try to apply obviously outdated laws to modern society...

In olden days people who were different (and in those days, Christians were different) were thrown to the lions. These days it seems that people who are different are thrown to the Christians.

May I also suggest to you that all people are people; and whether men are different colors, have different religions, or even have different sexual preferences, they are still people, subject to the same forces of good and evil, having the same feelings of love and hatred, and suffering injuries dealt them by their fellow man.

Finally, since you are so fond of quoting the Bible, Mr. Vandagriff, I have two for you to consider, which you undoubtedly have forgotten: "Judge not that you be not judged" and "Let he who is without sin cast the first stone."

(Excerpt from Letters to the Editor in the Tallahassee Democrat)
